Subject: "Testimony for February 13, 2018 Energy Cmte Meeting"

My name is Amanda tomczak I a frustrated mother of a family of four I was excited to get are smart meters to see the saving we would get with it and I definitely got the different effect of this meter getting installed my resent bill tripled and when I called and asked why my bill has increased so much they said we use way to much energy during the month of December and I explained to them I was on vacation in December and was not in home didn't have Christmas light or a Christmas tree this year because we knew we were leaving for vacation and didn't want the hasel when we just got are bill we were shocked and confused why it would be so high for no reason when we weren't home we didn't have lights or anything I'm really concerned as a mother of four how can this be and how can we when we went when home to have this much energy getting used when we wernt even home at this point my kids can't go with out power and with cold months going on we will have to cut on other things to make sure it's paid even when we don't agree with this bill one bit I feel ashed to even ask churchiez to help us with our bill it's sad to what these smart meters are doing to family to make us struggle even more then what we are now
